

SOUND FLOWER

The image features three identical pendant lights hanging from thin white cords against a soft pink background. Each light is a circular, symmetrical design made of many layers of light-colored, petal-like segments that radiate from a central white oval opening. The lights are arranged in a triangular pattern, with one at the top and two below it.

Introduction

Light That Listens. Sound That Settles. Design That Connects

SOUND FLOWER is an acoustic pendant light inspired by the natural symmetry and calm of plant life. Designed to support the sensory needs of both neurodivergent and neurotypical individuals, it enhances spaces through its blend of acoustic absorption, adaptive lighting, and biophilic form.

At its core, SOUND FLOWER helps people feel better in the environments where they work, learn, and think.

Sensory Adaptability

Light That Adapts to Your Mood

Our SOUND FLOWER pendant is supplied with a dedicated tablet pre-loaded with our ECHOBLOOM App. This intuitive app gives users complete control over the lighting — from brightness and dimming to colour-changing settings — empowering people to personalise their space instantly.

Whether calming blues, energising daylight tones, or warm ambient glows, SOUND FLOWER supports mood regulation, focus, and emotional wellbeing.

The ECHOBLOOM App makes it simple to adjust the lighting to suit the moment — reducing sensory overwhelm and creating conditions where people can truly thrive.

Acoustic Comfort

Quiet Focus, Naturally Delivered.

The SOUND FLOWER shade is crafted from 75% recycled PET felt, delivering excellent sound absorption performance while maintaining a soft, tactile presence.

Its large surface area and sculptural form are designed to reduce reverberation in open or echo-prone spaces — making it ideal for:

- Classrooms.
- Offices
- Meeting zones
- Quiet rooms
- Breakout spaces

Comfort isn't just about seating — it's in the sound around us.

Biophilic Design

Inspired by Nature. Grounded
in Science.

The shape and material language of SOUND FLOWER draw from biophilic design principles — echoing the patterns, symmetry, and calming familiarity of the natural world.

Its petal-like form brings a soft organic gesture into structured environments, while its felt texture adds a layer of visual and acoustic warmth.

Research shows that biophilic design can reduce stress, improve mood, and enhance productivity — all of which benefit neurodiverse and neurotypical users alike..

Sustainability & Materials

Made with Purpose. And Reuse.

SOUND FLOWER is designed and made in the UK using low-impact materials:

- PET felt: 75% post-consumer recycled plastic bottles
- Modular LED elements
- Low-energy colour-tunable lighting
- Disassembly-friendly design

We're committed to creating products that don't just work for people — but for the planet too.

Meeting

In meeting rooms, SOUND FLOWER enhances both clarity and comfort. Its sculptural shade reduces reverberation, ensuring voices remain clear and present.

The tunable light adapts to the rhythm of discussion — bright for focus, warm for consensus. More than illumination, it sets the atmosphere for productive, people-centred exchange.

Collaboration

For collaborative zones, SOUND FLOWER fosters energy and balance. Its acoustic qualities temper the buzz of conversation, while app-controlled lighting shifts tone to match different tasks — from lively brainstorming to reflective problem-solving.

The design encourages inclusivity, making shared spaces more adaptable, comfortable, and responsive to the flow of ideas.

Atria

Suspended in open atria, SOUND FLOWER becomes both sculpture and sanctuary. Its large, petal-like form absorbs sound while casting adaptable light across expansive spaces.

Acting as a visual anchor, it brings human scale and biophilic warmth to vast interiors, softening the atmosphere and creating a sense of connected calm.

Waiting

In waiting areas, SOUND FLOWER sets a gentle tone. Its soft form and acoustic presence reduce chatter, while its warm, adjustable light helps ease the edges of time spent in transition.

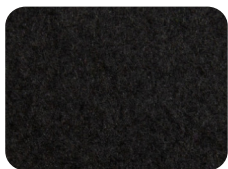

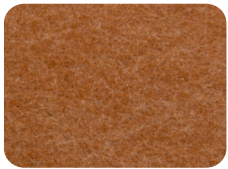

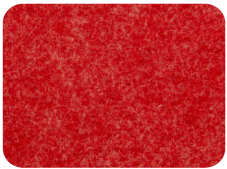

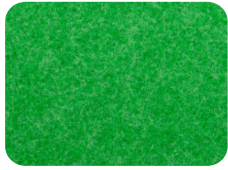

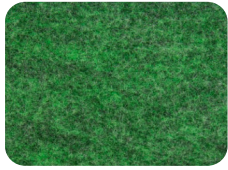

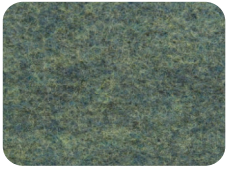

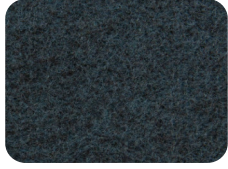

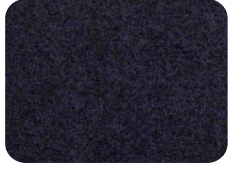

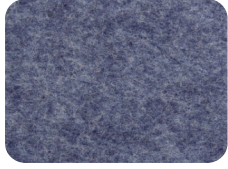

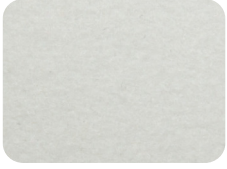

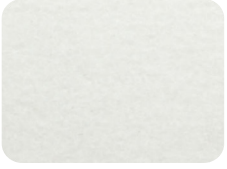

By combining comfort with character, it transforms waiting into an experience that feels thoughtful, welcoming, and restorative.

Study

SOUND FLOWER creates a cocoon of calm in study spaces. Its felt petals soften background noise while its adaptive glow shifts to support focus and clarity. Controlled through the ECHOBLOOM app, it balances acoustic comfort with personal choice, turning workspaces into places of quiet concentration and wellbeing.
